

Synchrony Systems is a leader in providing solutions for enterprises looking to modernize their legacy applications. Synchrony's leading conversion technology has been used by the top F100 companies to port their applications to a Rich UI environment. You will be joining Synchrony at a key point in its growth. Having grown successfully for the past 10 years, Synchrony is experiencing huge demand for its products and services and the successful candidate will be a key hire and is expected to significantly contribute to the company's on-going success.

Rich Internet Application Developer

The RIA Developer will work with the core Synchrony development team of architects and designers to build out Synchrony's UI migration tools. The Web 2.0 front-end will be used online by an ecosystem of partners and consultants during migration projects. RIA Developer will also build core UI infrastructure using Web 2.0 technologies.

The ideal candidate will have a strong background in Web 2.0 technologies and a deep understanding of JavaScript and HTML/DOM. You will be responsible for delivering running code and contributing to key technologies in use by multiple customers across multiple projects.

Responsibilities

- Develop user-centered highly interactive Web 2.0 tool front-ends
- Build web client side frameworks and widgets
- Create web mash-ups for tools
- Integrate testing tools with defect tracking/project management systems (Mingle/RTC)
- Use Synchrony tools to migrate customer applications
- Perform tool quality assurance and provide usability feedback
- Create tool documentation, provide tool training and technical support

Requirements

- 6+ years of experience as a web front-end developer
- Dojo Framework Knowledge
- Deep JavaScript – OO Development
- CSS/HTML/DOM/AJAX
- Experience with integration of UI with backend systems using Web Services
- Java/Eclipse front-end development a plus
- Motivated self-starter, ability to work well independently, good problem-solver, and strong analytical and organizational skills.

Telecommute position but may require travel to end-user client locations.

Salary commensurate with experience.
Health benefits included.
